(Machine Vision Parts)
- **Application Solution**
(Software Design & Development)
- **Project Evaluation**
(Full-service)

A full-service provider of machine vision

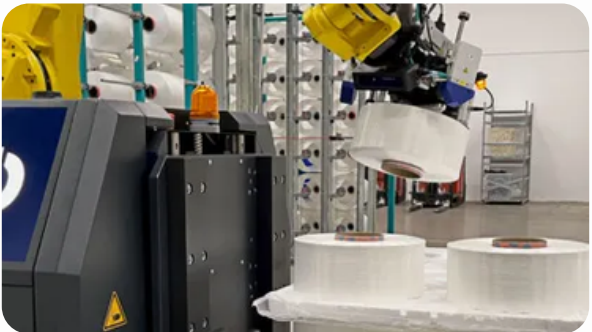

We are offering cutting-edge technology and expert support for industrial applications

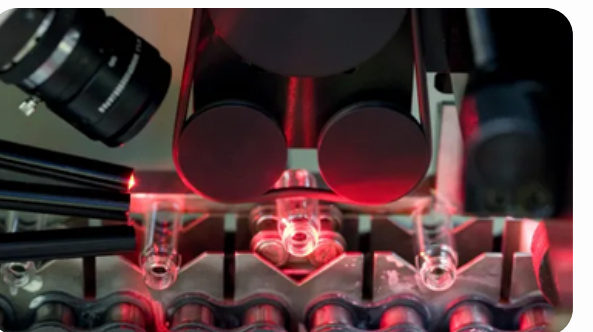

Detecting defects
Can detect especially when defects are difficult to detect for the human eye

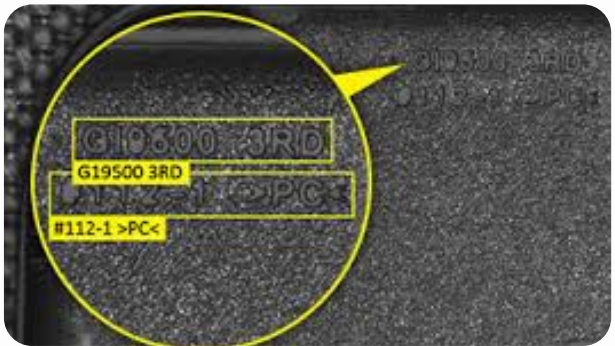

Assisting inspection process
Helping speeds up processes and ensures increased efficiency and quality

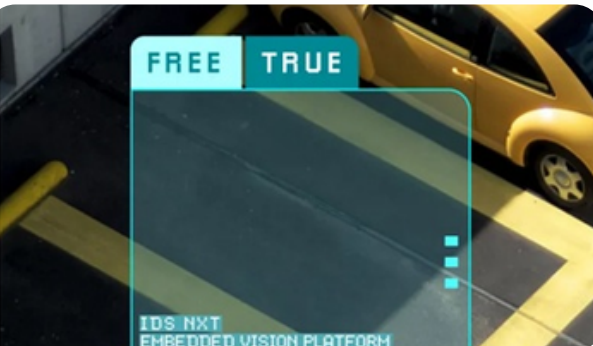

Robotic assistance system
Using 3D camera to send position data for the automated placement of products

Error Detection
Checking for completeness or detecting material defects

Reading OCR
Can compare OCR and QR code to verify accuracy and save data in CSV file

Determine presence/absence
To determine and check availabilities of parts, can be adapted in assembly line

Measure volume System

SSG Machine Vision : SSG ROBOT VOLUME MEASUREMENT

Volume Measurement Machine

Operation Page Model : Sample Refresh RUN Setting Shutdown

3D Image Result

Result		3D Camera	
	Min	Result	Max
Volume :	1700	9763.9 mm ³	10000
Pose X :	20.0	55.0 mm	70.0
Pose Y :	45.0	55.4 mm	100.0

Code : _____
